

A group of four people (three men and one woman) are seated around a table in a meeting. The image is overlaid with a dark teal color and a white grid pattern. The text is centered over the image.

FOUNDATION OF BUSINESS MANAGEMENT

Investor Opportunity

DESCRIPTION

- Business takes time and effort to plan, organise, and analyse critical business tasks, but it pays off in the long run with a well-managed firm and pleased staff.
- Typical tasks include forecasting the company's technical future, managing and educating employees, and overseeing day-to-day operations.

FEELINGS

- I felt that Businesses must constantly modify their strategy in reaction to the ever-changing business environment in order to remain competitive
- I also observed that Businesses that can anticipate alterations in their operational environment and react accordingly are successful.

EVALUATION

- The good thing is a company is free to make its own decisions on the resources it employs, the workers it recruits, the goods it creates, and the markets it serves.
- They put their expertise to use by creating items and services that both fulfil the requirements of their present clients and attract new ones. However, there is a limit to what management can do to accommodate the constantly changing external environmental factors that influence a corporation.
- To remain competitive, business owners and managers must constantly analyse the market and make required changes

CONCLUSION

- Individuals with a high EQ are self-aware and in control of their emotions, which allows them to respond logically to difficult events at work and quickly adapt to new settings (Silva, 2022).
- above-average interpersonal skills and a strong sense of empathy, they can work well together, cooperate efficiently, and communicate eloquently

ACTION PLAN

- To take many great ideas, filter them to choose the most significant ones, create a small list to analyse in depth, and then focus on a few key activities that have the best chance of assisting the organisation in achieving its strategic goals and intended future state.
- “It’s important for your team to know that the action plan is the tactical component of your overall business strategy, which is aimed at improving the performance of the company,”

THANK YOU
